Ms. Garrett:

I received your voice mail.

We did not receive final sealed drawings. We received preliminary plans, not sealed, from the US Fish and Wildlife Service. After an initial review of the drawings and aerial photographs, we determined that the structure did not meet the definition of a 'dam' in our rules; therefore, no further review was made nor is required by TCEQ.

Final plans were not requested so I have no final sealed drawings as you requested.

We did inform the City that we do not have jurisdiction.

Let me know if you have other questions.

Warren

Thank you so much Warren for your explanation. Can you send me what plans you did receive? That would be much appreciated.

Kelley
